

JAYR ABAWAG

Senior DevOps Consultant

Contact #: +63 905 215 2042 | jayr.abawag@3cloudsolutions.com

PROFESSIONAL SUMMARY

- Microsoft Certified **Azure Administrator Associate (AZ-104)** and **DevOps Engineer Expert (AZ-400)** with **10 years of experience** delivering cloud architecture, infrastructure automation, CI/CD engineering, and platform engineering solutions on Microsoft Azure.
- **DevOps platform specialist** building reusable, self-service Azure DevOps and GitHub Actions pipelines for infrastructure-as-code (Terraform, Bicep, ARM), container workloads, and API management.
- **Integrated policy-as-code and DevSecOps guardrails** (Azure Policy, Checkov, OPA, tfsec, container image scanning) into reusable CI workflows across environments.
- **Operated private AKS clusters with GitOps** (ArgoCD app-of-apps, Helm) backed by full observability stacks (Prometheus, Grafana, Loki, Azure Monitor, KEDA).
- **Spearheaded Zero Trust adoption** using Azure IAM, conditional access policies, just-in-time privileged access, and mobile device management (Intune).
- **AI platform experience:** provisioned Azure OpenAI instances and ML workspaces via IaC, with hands-on work in LangChain, llama.cpp, and FastAPI.

TECHNICAL SKILLS

Cloud Platforms:	Microsoft Azure (IaaS, PaaS, SaaS), AWS, GCP
DevOps & CI/CD:	Azure DevOps, GitHub Actions, Harness.io, GitOps (ArgoCD), Trunk-Based Development, Semantic Versioning
Infrastructure as Code:	Terraform, Bicep, ARM Templates, Ansible
Containers & Orchestration:	Docker, Kubernetes, Azure Kubernetes Service (AKS), Talos Linux, Helm, Istio Service Mesh
Monitoring & Observability:	Prometheus, Grafana, Loki, ELK Stack, Azure Monitor, KEDA Autoscaling
Security & Governance:	Zero Trust, Azure IAM, Conditional Access, Just-in-Time Privileged Access, Intune MDM, Azure Policy as Code, Checkov, OPA, tfsec
API & Platform Services:	Azure API Management (APIM), Azure Container Registry, Harbor, cert-manager, Sealed Secrets, Cloudflare DNS
Programming & AI Tooling:	Python, FastAPI, Node.js, PowerShell, Bash, LangChain, llama.cpp

WORK EXPERIENCE

SENIOR CONSULTANT - DEVOPS | 3Cloud | May 2025 - Present

- **Implemented APIOPS extractor and publisher pipelines** in Azure DevOps, configuring APIs, backends, and named values, using **Bicep IaC pipelines** to deploy Azure APIM and other core resources.
- **Built Azure dashboards and monitoring** for API Management **gateway CPU utilization, capacity, request volume**, and **P95 latency**, improving visibility into platform health.
- **Deployed Azure private infrastructure with Terraform workflows** for each environment, including Azure DevOps for **Terraform, Fabric, and Power Platform pipelines** build, deploy, and release automation with semantic versioning.

- **Delivered Terraform plan/apply GitHub workflows** with GitHub rulesets and a trunk-based release flow for reusable IaC templates.
- **Created least-privileged backend bootstrap scripts** scoped to a single container per environment, and set up GitHub OAuth apps and managed-identity federated credentials.
- **Integrated policy-as-code (Azure Policy, Checkov, OPA)**, automated test and scans (tfsec, and container image scanning) into reusable workflows.
- **Implemented GitOps deployment with ArgoCD** (app-of-apps) for cert-manager and monitoring via Helm, and built the Prometheus-Grafana-Loki monitoring baseline.

CLOUD ENGINEER | AEVEN PH | Feb 2024 - May 2025

- **Designed reusable Azure DevOps pipelines** deploying ML workspaces and Azure OpenAI instances with Terraform, plus **self-service provisioning** of CPU and GPU ML workspace VMs.
- **Delivered reusable pipelines for private AKS clusters**, bootstrapping workers, minimal networking, and core resources.
- **Automated deployment of internal platform tooling** - ArgoCD, cert-manager, Harbor, Sealed Secrets, and AKS plugins for PVC storage and Key Vault secrets.
- **Managed scheduled upgrades of multiple AKS clusters** to keep cluster and tooling versions supported and up to date.
- **Created an image-scanning pipeline** using Azure DevOps, Azure Container Registry, and Harbor for downstream and shared application images.
- **Implemented monitoring, logging, and alerting systems** for deployed workloads and clusters.

AZURE DEVOPS ENGINEER | Reed Elsevier Philippines | Jul 2023 - Feb 2024

- **Built CI/CD pipelines for Terraform IaC** using Azure DevOps, and Python deployment pipelines with Docker build and Helm deployments.
- **Implemented a private AKS cluster and Azure OpenAI instance** using Terraform pipeline.
- **Deployed a Helm-based Prometheus-Grafana monitoring stack and KEDA autoscaling** using custom traffic-based metrics.

SENIOR SYSTEMS ENGINEER | nextix.co | Nov 2016 - Jun 2023

- **Managed Azure and Intune enterprise infrastructures**, implementing IaC with Terraform through Azure DevOps Pipeline and classic release pipelines.
- **Spearheaded Zero Trust implementation** with Azure IAM, conditional access policies, just-in-time privileged access, and MDM.
- **Automated Docker image builds and YAML manifest deployments** through pipelines for **microservices** applications.
- **Managed self-service certificates, Cloudflare DNS, and Azure API Management**, and implemented **Istio service mesh** for cross-service communication.

EDUCATION

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

Southwestern University of Cebu | 2009 - 2013

CERTIFICATIONS

- Microsoft Certified: **DevOps Engineer Expert (AZ-400)**
- Microsoft Certified: **Azure Administrator Associate (AZ-104)**
